Re: Spoke Resources Certificate of Restoration Application (part II) for the Well Site SPK Adsett D-80-L/94-J-02 (WA # 20698)

This office has received an Application for a Certificate of Restoration (CoR-Part II), and a Surface Reclamation Assessment Report for wellsite (**Never Drilled**) for the above referenced well authorization (WA # 20698) submitted by SynergyAspen Environmental on behalf of Spoke Resources Limited on September 4th, 2019.

Based upon review of the information provided by the applicant, the reclamation inspection assessment report was reviewed and was found that the site has been fully reclaimed and the restoration of the site is satisfactory. Therefore, your application for a Certificate of Restoration is approved and a copy of the Certificate of Restoration is enclosed (Certificate # 5996).

Please note Section 41(3) of the Oil and Gas Activities Act (OGAA) and section 47 (1) of the Environmental Management Act, which respectively read:

"The issuance of a certificate of restoration does not relieve a person from any obligations under section 40 or under an order referred to in subsection (1) (b) of this section in respect of any matter that was not known to the commission at the time the certificate of restoration was issued."

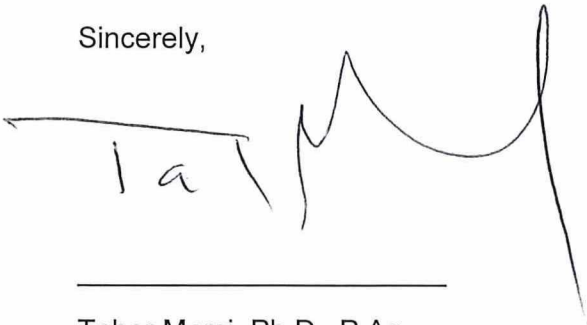

And:

"A person who is responsible for remediation of a contaminated site is absolutely, retroactively and jointly and separately liable to any person or government body for reasonably incurred costs of remediation of the contaminated site, whether incurred on or off the contaminated site."

Therefore Canadian Natural Resources Limited remains liable for any contamination presently on site.

Any questions can be directed to the undersigned at (250) 794-5234

Sincerely,

A handwritten signature in black ink, appearing to read 'Taher Morsi', with a horizontal line underneath.

Description of Area(s) Restored (Location, Remote Sump, Access and other disturbed areas affiliated with this location):

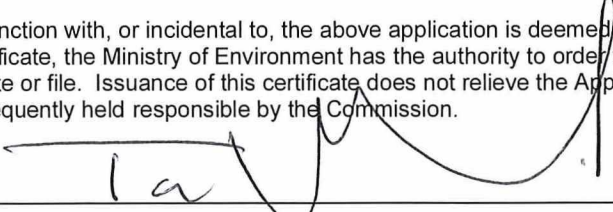

The Site was constructed in 2006 after being approved on December 21, 2005. The Site was not drilled the well license was officially cancelled on January 1, 2009.

The Site was a cut and fill, therefore during reclamation the Site was de-compacted, recontoured and drainage and topography incorporated into the surrounding landscape. Woody debris salvaged from topsoil piles was redistributed across the Site and placed into the drainage swales to prevent erosion and help maintain consistent soil moisture, by providing shade for new seedlings. The site was seeded to the Fort Nelson Forestry Seed Mix.

Details of any areas left unrestored at Landowner's request:
