Re: Canadian Natural Resources Certificate of Restoration Application (part II) for the Well Site CNRL Et Al Flstock 6-33-85-17 W6M (WA # 7416)

This office has received an Application for a Certificate of Restoration (CoR-Part II), and a Surface Reclamation Assessment (**Schedule B**) Report for wellsite for the above referenced well authorization (WA # 7416) submitted by SynergyAspen Environmental on behalf of Canadian Natural Resources Limited on December 12th, 2018.

Based upon review of the information provided by the applicant, the reclamation inspection assessment report was reviewed and was found that the site has been fully reclaimed and the restoration of the site is satisfactory. Therefore, your application for a Certificate of Restoration is approved and a copy of the Certificate of Restoration is enclosed (Certificate # 5937).

Please note Section 41(3) of the Oil and Gas Activities Act (OGAA) and section 47 (1) of the Environmental Management Act, which respectively read:

"The issuance of a certificate of restoration does not relieve a person from any obligations under section 40 or under an order referred to in subsection (1) (b) of this section in respect of any matter that was not known to the commission at the time the certificate of restoration was issued."

And:

"A person who is responsible for remediation of a contaminated site is absolutely, retroactively and jointly and separately liable to any person or government body for reasonably incurred costs of remediation of the contaminated site, whether incurred on or off the contaminated site."

Therefore Canadian Natural Resources Limited remains liable for any contamination presently on site.

Any questions can be directed to the undersigned at (250) 794-5234

Sincerely,

A handwritten signature in black ink, appearing to read 'Taher Morsi', with a horizontal line underneath.

RESTORATION INFORMATION	C
Description of Area(s) Restored (Location, Remote Sump, Access and other disturbed areas affiliated with this location):	
The wellsite measured 115 m x 115 m and was constructed on forested, Crown land. The wellsite was accessed via an existing lease road that services several wellsites. The reclaimed lease access measures 20 by 50m. A borrow pit is associated with the well location. The wellsite was located within the boundaries of the Agricultural Land Reserve. It is the opinion of SynergyAspen Environmental Inc. that the wellsite borrow pit and parts of the access road have been satisfactorily restored and no further work is required.	
Details of any areas left unrestored at Landowner's request:	
Crown Land	
Was "Approval to Construct" subject to any reclamation conditions? <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO	
Reclamation Inspection Report included? <input checked="" type="checkbox"/> YES <input type="checkbox"/> NO	
Is this location within the Agricultural Land Reserve? If YES, attach Schedule B <input checked="" type="checkbox"/> YES <input type="checkbox"/> NO	

APPROVAL – FOR COMMISSION USE ONLY		D
CERTIFICATE OF RESTORATION	CERTIFICATE NO.	5937
<p>This is to certify that the surface of the land held in conjunction with, or incidental to, the above application is deemed to be satisfactorily restored. Despite the issuance of this Certificate, the Ministry of Environment has the authority to order further site investigation or remedial action upon inspection of the site or file. Issuance of this certificate does not relieve the Applicant of any restoration requirements for which the Applicant is subsequently held responsible by the Commission.</p>		
Approval Date:	Jan 24, 2019	 Authorized Commission Employee
