Re: Whitecap Resources Certificate of Restoration Application (part II) for the Well Site Whitecap Et Al Boundary 03-30-86-13 W6M (WA # 02515)

This office has received an Application for a Certificate of Restoration (CoR-Part II), and a Surface Reclamation Assessment Report for wellsite for the above referenced well authorization (WA # 02515) submitted by SynergyAspen Environmental on behalf of Whitecap Resources Inc. on January 25th, 2018.

The reclamation assessment report reviewed and found that the site has been fully reclaimed and the restoration of the site is satisfactory. Therefore, your application for a Certificate of Restoration is approved and a copy of the Certificate of Restoration is enclosed (Certificate # 5832).

Please note Section 41(3) of the Oil and Gas Activities Act (OGAA) and section 47 (1) of the Environmental Management Act, which respectively read:

“The issuance of a certificate of restoration does not relieve a person from any obligations under section 40 or under an order referred to in subsection (1) (b) of this section in respect of any matter that was not known to the commission at the time the certificate of restoration was issued.”

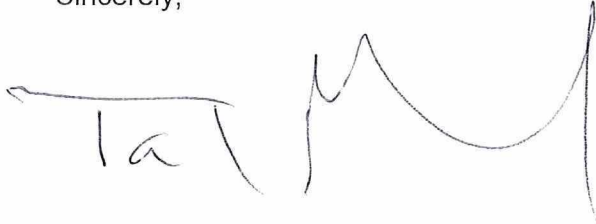

And:

“A person who is responsible for remediation of a contaminated site is absolutely, retroactively and jointly and separately liable to any person or government body for reasonably incurred costs of remediation of the contaminated site, whether incurred on or off the contaminated site.”

Therefore Whitecap Resources Inc. remains liable for any contamination presently on site.

Any questions can be directed to the undersigned at (250) 794-5234

Sincerely,

A handwritten signature in black ink, appearing to read 'Taher Morsi'. The signature is written in a cursive style with a horizontal line extending to the left from the first letter 'T'.

RESTORATION INFORMATION		C
Description of Area(s) Restored (<i>Location, Remote Sump, Access and other disturbed areas affiliated with this location</i>):		
Wellsite and access road were reclaimed. Topographic and landscape parameters are considered comparable to the adjacent offsite control and compatible with current land-use.		
At the time of the last inspection the site was well vegetated and it was estimated that cover was in excess of 80%. The vegetation health, height, and vigour were rated as good during the on-Site assessment. In general large bare patches were not present.		
No noxious or nuisance of weeds of concern were observed at the site.		
Details of any areas left unrestored at Landowner's request:		
Crown Land		
Was "Approval to Construct" subject to any reclamation conditions?		<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
Reclamation Inspection Report included?		<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
Is this location within the Agricultural Land Reserve? <i>If YES, attach Schedule B</i>		<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO

APPROVAL – FOR COMMISSION USE ONLY

D

CERTIFICATE OF RESTORATION

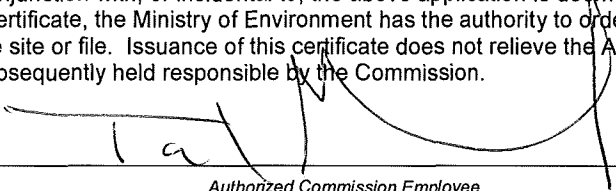

CERTIFICATE NO.

5832

This is to certify that the surface of the land held in conjunction with, or incidental to, the above application is deemed to be satisfactorily restored. Despite the issuance of this Certificate, the Ministry of Environment has the authority to order further site investigation or remedial action upon inspection of the site or file. Issuance of this certificate does not relieve the Applicant of any restoration requirements for which the Applicant is subsequently held responsible by the Commission.

Approval Date:

Feb 26, 2018
