Re: TAQA North Certificate of Restoration Application (Part-II) for the Well Site TAQA North Kensington Siphon B10-20-86-16 W6M (WA # 9845)

This office has received an Application for a Certificate of Restoration (CoR-Part II), and a Surface Reclamation Assessment Report for wellsite the above referenced well authorization (WA # 9845) submitted by SynergyAspen Environmental on behalf of TAQA North Ltd on December 28<sup>th</sup>, 2017.

Based upon review of the information provided by the applicant, the reclamation inspection assessment report was reviewed and was found that the site has been fully reclaimed and the restoration of the site is satisfactory. Therefore, your application for a Certificate of Restoration is approved and a copy of the Certificate of Restoration is enclosed (Certificate # 5785).

Please note Section 41(3) of the Oil and Gas Activities Act (OGAA) and section 47 (1) of the Environmental Management Act, which respectively read:

**"The issuance of a certificate of restoration does not relieve a person from any obligations under section 40 or under an order referred to in subsection (1) (b) of this section in respect of any matter that was not known to the commission at the time the certificate of restoration was issued."**

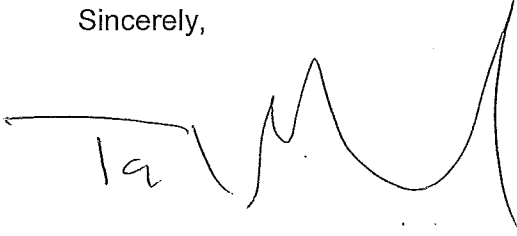

And:

**"A person who is responsible for remediation of a contaminated site is absolutely, retroactively and jointly and separately liable to any person or government body for reasonably incurred costs of remediation of the contaminated site, whether incurred on or off the contaminated site."**

Therefore TAQA North Ltd remains liable for any contamination presently on site.

Any questions can be directed to the undersigned at (250) 794-5234

Sincerely,

RESTORATION INFORMATION		C
Description of Area(s) Restored ( <i>Location, Remote Sump, Access and other disturbed areas affiliated with this location</i> ):		
<p>The wellsite is 120 m x 120 m in size and is located within the agricultural land reserve on private land. A 30 m x 60 m temporary campsite and a 20 m x 2.68 km access road were also constructed in association with the site. No other ancillary sites were constructed or affiliated with the wellsite. The site is located within a forested area used for grazing cattle. Numerous attempts have been made to contact the landowner over a period of several years, which have been largely unsuccessful. Some weeds remain on-site that cannot be controlled due to locked gates and cattle that are consistently present on the site. A registered letter was sent to the landowners in September 2016 that was signed for by landowner Brenda Rowbotham, and no reply has been received to date. Taking into consideration the constraints imposed by the landowners, it is the opinion of SynergyAspen that the wellsite, campsite and access road have been satisfactorily restored and no further work is required at the site.</p>

CERTIFICATE OF RESTORATION

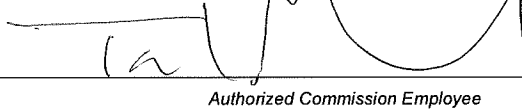

CERTIFICATE NO.

5785

This is to certify that the surface of the land held in conjunction with, or incidental to, the above application is deemed to be satisfactorily restored. Despite the issuance of this Certificate, the Ministry of Environment has the authority to order further site investigation or remedial action upon inspection of the site or file. Issuance of this certificate does not relieve the Applicant of any restoration requirements for which the Applicant is subsequently held responsible by the Commission.
