RE: Pipeline constructed contrary to regulations

Dear Mr. Bishop,

On August 9, 2019, the BC Oil and Gas Commission (Commission) issued AltaGas Holdings Inc. (AltaGas) pipeline permit #100107086 (permit) to construct a pipeline in the province of British Columbia.

During an inspection of the pipeline by Commission staff, it was discovered that a slide had occurred that resulted in eroded material leaving the permitted right of way. Once AltaGas was notified of the issue, they commenced clean up and rehabilitation of the right of way and surrounding land. AltaGas cooperated with the Commission on the investigation.

During the investigation, it was determined that AltaGas did not follow their own Environmental Protection Plan on the construction and inspection of the pipeline.

Given the circumstances, AltaGas is hereby issued a warning for the following:

AltaGas, on or about June 10, 2020, did fail to comply with Section 3(1)(a) of the *Pipeline Regulations*.

If AltaGas has any questions about this matter, please feel free to contact the undersigned.

Sincerely,

<original signed by>

Compliance and Enforcement Officer
BC Oil and Gas Commission
