

EXAMPLE LETTER – CONSENT TO INCLUSION IN A RESERVOIR PROJECT

The following is an example of an acceptable letter that may be provided to the BCER when applying for a reservoir project (Good Engineering Practice, Waterflood or Gas Injection Pressure Maintenance, Concurrent Production, Salt Water or Acid Gas Disposal), from each of the subsurface tenure holders (as registered with the British Columbia Ministry of Energy, Mines and Low Carbon Innovation, Titles Branch), within the area and formation of application. Consent letters are not required where the applicant is the designated operator of a Unit Agreement for the zone of application.

This format may also be used when requesting an area amendment to a previously approved project.

However, the consenting tenure holder is not limited to the exclusive use of this format.
