### **General, Authorizations and Conditions**

#### **Authorizations**

##### **Water Sustainability Act**

The BC Energy Regulator, pursuant to section 10 of the Water Sustainability Act, hereby authorizes the diversion, storage and use of Crown water from the point(s) of diversion detailed in the Short Term Water Use Details table below.

#### **Conditions**

##### **Clearing/Forest Act**

2. The permit holder is permitted to fell any trees located on Crown land within 1.5 tree lengths of the activity area that are considered to be a safety hazard according to Workers Compensation Act regulations and must be felled in order to eliminate the hazard. Trees or portions of these trees that can be accessed from the activity area without causing damage to standing timber may be harvested.

*All authorizations for this activity are subject to the following conditions:*

#### Short Term Water Use Conditions

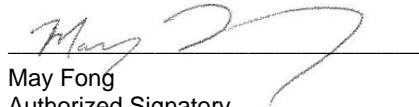

1. No instream works are permitted under this authorization.
2. A copy of this authorization must be available for inspection at the point of diversion and use location(s).
3. Water withdrawn under this authorization must only be used for the purposes of carrying out the oil and gas activities or related activities.
4. Water must not be diverted or withdrawn from any beaver pond.
5. The permit holder must maintain accurate records of all water withdrawal activities throughout the term authorized. Water withdrawal records for each diversion point, including '0' values for months where no water was withdrawn, must be recorded monthly. Water withdrawal records must be submitted to the BC Energy Regulator on a quarterly basis via e-Submission. Quarterly reports are due on or before April 25, July 25, October 25 and January 25.
6. At any time, the BC Energy Regulator may suspend short term water use previously authorized. Water use suspensions will remain in place until such time as the BC Energy Regulator notifies permit holders that water withdrawals may resume.
7. The Permit Holder must notify the First Nation(s) copied on this permit/authorization at least 5 (five) working days prior to project commencement. The permit holder must not undertake any of the following on Crown land to carry out activities authorized herein:
  - a. blading or excavation of the ground surface;
  - b. in-stream works; or
  - c. harvest of Crown timber.
8. The approval holder is authorized to store fresh water diverted under this use approval in dugouts or other fresh water storage structures provided:
  - a. the approval holder holds a valid permit or authorization to occupy the land on which the dugout or structure is located on unless a permit or authorization is not required, and
  - b. the dugout or structure is not subject to the Dam Safety Regulation unless the approval holder has a valid Water Licence and Leave to Operate the water storage structure.
9. The Permit Holder must maintain instrumentation to enable continuous and concurrent monitoring of the pumping rate, water level, temperature, and electrical conductivity in WTN #129264, and water level, temperature, and electrical conductivity in nearby observation wells, at regular time intervals deemed appropriate by a professional with competency in hydrogeology who is registered and in good standing with Engineers and Geoscientist of British Columbia (Professional).

10. The Permit Holder must retain all records of the well pumping rate and water level, temperature and electrical conductivity data from Condition 9 and provide the data to the BC Energy Regulator within 5 working days of a request.
11. The water level in WTN #129264 must not be drawn down below sea level at any time during pumping.
12. A notice of water withdrawal start must be submitted to hydrogeology@bc-er.ca at least 48 hours prior to the commencement of activities under this permit.
13. Upon expiration of this STWU approval, the well must be properly decommissioned in accordance with the BC Groundwater Protection Regulation.
