Prince Rupert Gas Transmission Ltd.
450-1st Street SW
Calgary, Alberta T2P 5H1

Attention: Surface Land Administrator

Re: Approval for Short Term Use of Water

This approves you, under Section 8 of the Water Act to divert and use water as follows:

1. The approved water withdrawal point is Shegunia River at:
   UTM location N. 6138091, E. 598859.

2. The approved use of water is restricted to the oil and gas activities of the Operator.

3. The maximum quantity of water that may be diverted is 5 m³/day, at a rate not to exceed
   141/s (0.5 cfs).

4. The maximum quantity of water that may be diverted during the duration of the
   authorization is 225 m³.

5. On any stream, no diversion is permitted where stream discharge is less than 55 l/s, or
   where the diversion will cause the stream discharge to fall below 55 l/s. No diversion is
   permitted where stream (wetted) depth is less than 0.30 metres (12 inches) at the
   withdrawal location, or where the diversion will cause the stream (wetted) depth to fall
   below 0.30 metres (12 inches) at the withdrawal location.

6. On any lake, water withdrawal must cease if drawdown exceeds 0.10 metres (relative to
   the water level documented at the commencement of withdrawal activities). In the event
   that drawdown exceeds 0.10 metres, withdrawals may resume only when water levels
   have risen above the 0.10 metres drawdown level.

7. No water will be diverted or removed from any beaver pond.

8. Approval has been granted to use the water from January 11, 2014 to January 10, 2016.

9. This approval does not authorize any instream work.

10. A copy of this approval must be available for inspection at the tank truck and drillsite
    location(s).

11. End-of-pipe intakes must contain a screen with a mesh size that does not exceed one
    tenth of an inch.
12. The holder of this approval must maintain accurate records of all water withdrawal activities throughout the term of this permit. A digital spreadsheet has been sent to the applicant's email provided on the application. Water withdrawal records for each diversion point, including "0" values for months where no water was withdrawn, must be recorded monthly on the digital spreadsheet provided. The spreadsheet must be submitted to the Oil and Gas Commission on a quarterly basis to OGCWater.VolumeData@bcogc.ca. Quarterly reports are due on or before April 25th, July 25th, October 25th, and January 25th. Do not modify the digital spreadsheet as it is designed to be interpreted by Commission software. If a cell/field in the spreadsheet is not relevant to the permitted activity, leave it blank.

13. In times of drought, the Commission may suspend short term water use previously authorized when there is risk to other resources that may result from the withdrawal of water. Water use suspensions may remain in place until such time as the Commission is satisfied that there is sufficient water in the applicable water body or water course to permit the short term use of the amount specified in the approval.

Additional Conditions:

1. The permit holder is to notify the Max Hla Gandit Laxwiiyip prior to commencement of project.

2. The permit holder is to notify the Lax Xsin Djihl Laxwiiyip prior to commencement of project.

The attached plan(s) form an integral part of this authorization.

Justin Anderson
Natural Resource Officer
