Attention: Ashley Riesberg

**RE: Investigative Use located in c-72-F, 92-I-16**

**Date of Issuance: September 20, 2016**

**Commission No.: 9644369**

## **AUTHORIZATIONS**

### ***Land Act***

1. The BC Oil and Gas Commission (the “Commission”), under section 39 of the *Land Act*, hereby authorizes Trans Mountain Pipeline ULC ( the “permit holder”) to occupy and use the Crown land area identified in the attached construction plan number PER\_00915\_WS6\_REV0\_CP, Revision 0, dated April 28, 2016 (the “construction plan”), submitted to the Commission dated May 27, 2016 (hereinafter referenced together as the “operating area”) to construct and operate a related activity for the purposes of carrying out oil and gas activities as defined in the *Oil and Gas Activities Act*, subject to the conditions set out below.
  - (1) The total disturbance within the operating area must not exceed 0.02 ha.
  - (2) A section 39 License of Occupation for the Crown land portion of this authorization is attached or will follow. The permit holder is subject to the conditions contained in the Licence of Occupation.

## **CONDITIONS**

### **Notification:**

2. A notice of construction start must be submitted to the Commission a minimum of 48 hours prior to the commencement of activities under this permit. Notification must be sent via [OGC.ExternalNotifications@bcogc.ca](mailto:OGC.ExternalNotifications@bcogc.ca).
3. Within 60 days of the completion of construction activities under this permit, the permit holder must submit to the Commission a post-construction plan as a shapefile and PDF plan accurately

identifying the location of the total area actually disturbed under this permit. The shapefile and plan must be submitted via eSubmission.

4. The permit holder must notify Tk'emlups Band a minimum of five (5) days prior to commencing any construction activities under this permit.
5. The permit holder must notify Skeetchestn Indian Band a minimum of five (5) days prior to commencing any construction activities under this permit.
6. The permit holder must notify Stk'emlupsemc te Secwepemc Nation a minimum of five (5) days prior to commencing any construction activities under this permit.
7. The permit holder must notify Neskonlith Indian Band a minimum of five (5) days prior to commencing any construction activities under this permit.

**Environmental:**

8. The permit holder must not undertake construction or significant maintenance activities between April 1 and August 15.
9. Prior to commencing construction activities, the permit holder must conduct a survey identifying any American Badger burrows located within 100m of the Investigative Use Area.
10. The permit holder must not undertake construction or significant maintenance activities within 100m of an occupied American Badger burrow that was identified by the survey conducted in accordance with condition # 9.
11. Following completion of the activities authorized herein the permit holder must, as soon as practicable:
  - (1) decompact any soils compacted by the activity;
  - (2) if natural surface drainage pattern was altered by the carrying out of the activity, the permit holder must restore, to the extent practicable, to the drainage pattern and its condition before the alteration; and
  - (3) ensure re-vegetation of any exposed soil on the operating area including, where necessary, using seed or vegetative propagules of an ecologically suitable species that
    - (a) promote the restoration of the wildlife habitat that existed on the area before the oil and gas activity was begun, and
    - (b) stabilize the soil if it is highly susceptible to erosion.
12. Following completion of the activities authorized herein, any surface soils removed from the site must be redistributed so that the soil structure is restored, to the extent practicable, to its condition before the activity was begun.
13. The permit holder is authorized to fell any trees located on Crown land within 1.5 tree lengths of the operating area that are considered to be a safety hazard according to *Workers Compensation Act* regulations and must be felled in order to eliminate the hazard. Trees or portions of these trees that can be accessed from the operating area without causing damage to standing timber may be harvested.

**Archaeology:**

14. An AIA report must be submitted to the Commission as soon as practicable.

If artifacts, features, materials or things protected under section 13(2) of the Heritage Conservation Act are identified the permit holder must, unless the permit holder holds a permit under section 12 of the Heritage Conservation Act (Site Alteration Permit) in respect of that artifact, feature, material or thing immediately cease all work in the vicinity of the artifacts, features, materials or things.

**ADVISORY GUIDANCE**

1. Submission of the original application and submission of the post-construction plan is considered an application for all subsequent applicable *Land Act* tenures. Upon the Commission's acceptance of the post-construction plan no further applications for replacement tenure are required.
2. Unless a condition or its context suggests otherwise, terms used in this approval have the same meaning as the Environmental Protection and Management Regulation under the *Oil and Gas Activities Act*.

The attached plan(s) forms an integral part of this authorization.
