

Updated Measurement Guideline Released

TO: Industry Clients

EFFECTIVE: Immediately

BACKGROUND:

The BC Oil and Gas Commission (Commission) has posted the Measurement Guideline for Upstream Oil and Gas Operations to its website. This guideline explains to permit holders the expectations of the Commission as described in Section 53 of the Drilling and Production Regulation under the Oil and Gas Activities Act.

The guideline, previously known as the Measurement Requirements for Upstream Oil and Gas Operations Manual, has been updated with information including the addition of Chapter 6: Determination of Production at Gas Wells; updates to requirements and references; introduction of a decision tree analysis for well testing, and updates to measurement requirements for consistency with other provincial regulators.

The guideline can be found on the Commission's website [here](#).
