

## Winter Stream Crossing Requirement Changes

TO: Industry Clients

EFFECTIVE DATE: Jan. 1, 2014

The BC Oil and Gas Commission (Commission) is rescinding the requirement for submission and registration of all temporary snowfill, ice bridge or snow blown ice bridges as per the Winter Stream Crossing Tracking Module User Guide located on the Commission website. With enhancements to the Geographic Spatial System, the Commission can now track, monitor, and inspect all applied for and approved stream crossing methods without the requirement to register through the Winter Stream Crossing Tracking Module.

Documentation pertaining to the Winter Stream Crossing Tracking Module is being updated to reflect this change. Once in effect, the client portal located on the Commission website will be removed. Authorization under Section 9 of the Water Act is still mandatory for all Changes in and about a Stream.
