

## Requirement for Individual Ownership Plans

The BC Oil and Gas Commission (Commission) is now requiring new oil and gas activity applications to contain Individual Ownership Plans (IOP).

The Commission requires applicants, where applicable, to submit an IOP along with their application package. An IOP is only required for private land where a land owner is directly impacted and a surface agreement is required.

The purpose of the IOP is to allow land owners directly impacted by an oil and gas activity to easily identify the area of their land that has been permitted for an oil and gas activity.

The following manuals have been updated to reflect this requirement:

- [Pipeline Permit Application Manual](#)
- [Consultation and Notification Manual](#)
- [Well Permit Application Manual](#)
- [Well Permit Application Form](#)
- [Facility Application and Operations Manual](#)
- [Road Application and Operations Manual](#)
- [Road Permit Application and Amendment Form](#)
- [Geophysical Exploration Application Manual](#)
- [Geophysical Exploration Permit Application Form](#)
