

## KERMIT and eSubmission are Now Available

**EFFECTIVE DATE:** IMMEDIATELY

The BC Oil and Gas Commission (Commission) is advising industry that the KERMIT system, the eSubmission portal, as well as Well Reports and Data Downloads, are now available after being down for a short outage period. Links to these can be found on our [Online Services](#) page.

### **KERMIT**

The KERMIT system is now available and has been updated to align with the Commission's new Application Management System (AMS), which launches on July 11. These changes were initially communicated in [INDB 2016-10](#).

Please note that processes for incident reporting via KERMIT have now returned to normal. Permit holders are reminded that they must enter in any minor incidents that took place during the system outage.

### **eSubmission**

An expanded version of eSubmission is now available and includes the ability for users to submit additional post permit approval submissions, as well as the ability to submit some spatial data previously submitted via ePASS. This was outlined in [INDB 2016-21](#). Please note that permit holders must ensure that any activity that occurred during the outage period is now submitted via the eSubmission portal.

For more information on eSubmission and its associated security roles, please see [INDB 2016-21](#) or the updated [eSubmission Portal User Guide](#).

All other applications, as communicated in [INDB 2016-15](#), remain offline until **8:30am PST July 11, 2016**.
