

INDUSTRY BULLETIN

2011-28

November 3, 2011

Operating Zones Updated

TO: All Industry Stakeholders

EFFECTIVE DATE: Immediately

BACKGROUND:

The BC Oil and Gas Commission (Commission) operating zones have been updated. Through the change, the East and West zones have been incorporated into the Central zone. The North and South zones are unchanged. This change reflects how the Commission currently manages applications. The map can be viewed [here](#).

REQUIREMENTS:

Applications should be submitted reflecting these updates and in one of the three zones: North, Central or South.

iMap can be used as a reference as changes have been made to reflect the update. Commission application screening staff are aware of the adjustment to iMap and this change will not affect application submissions. Changes will be made to the Commission's application system, forms and manuals to reflect the zone updates.
