

Quarterly Annual Compliance Plan Summary

Third Quarter 2022/23 (Oct.-Dec.)

PURPOSE

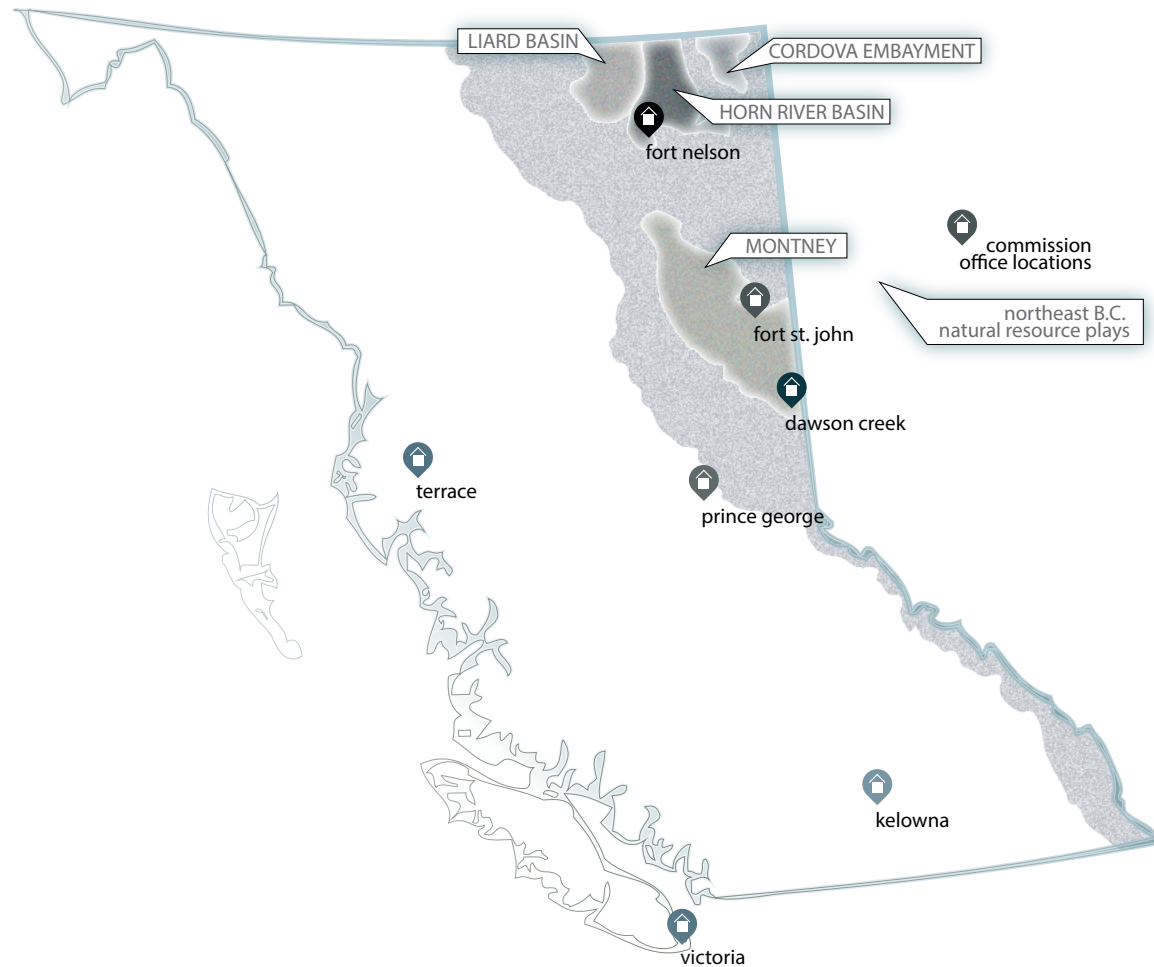

This report provides a summary of activities carried out under the BC Oil and Gas Commission's Annual Compliance Plan for fiscal year 2022/23 and progress made towards achieving our associated targets.

The Commission's Plan, Do, Check, Act method provides certainty that our approach continuously improves, leading to increased effectiveness of compliance oversight.

BC OIL AND GAS COMMISSION

The [BC Oil and Gas Commission](#) (Commission) is the provincial regulatory agency with responsibilities for regulating oil, gas and geothermal activities in British Columbia, including exploration, development, pipeline transportation and reclamation. We protect public safety and safeguard the environment while balancing a broad range of environmental, economic, and social considerations.

From exploration through to final reclamation, we respect those affected by oil and gas activities, cooperating with partner agencies while working closely with communities, First Nations, and land owners, and confirming industry compliance with provincial legislation. We are committed to advancing reconciliation and establishing close working relationships with Indigenous peoples throughout the energy life cycle.

COMPLIANCE MANAGEMENT AND OVERSIGHT

The Oil and Gas Activities Act provides the Commission's mandate to regulate oil and gas activities in B.C. A comprehensive regulatory framework governing oil and gas operations has been developed by the Province and the Commission. The assessment of compliance within that framework is a critical element in fulfilling the Commission's mandate.

The Commission's Compliance Management System (CMS) includes the principles, roles, responsibilities, requirements, and methodologies - established in a Compliance Management Policy - through which the Commission assures compliance of oil and gas activities with the regulatory framework.

Operation and continuous improvement of the Commission's CMS is guided by a Compliance Management Steering Committee, consisting of senior leadership from several operational and technical business units and is led by the Commission's Executive Vice President, Safety and Compliance.

Compliance Principles

All compliance management processes under the Commission's CMS are designed, planned, carried out and evaluated in accordance with the following principles:

- **Fair:** Compliance activities afford all affected parties a fair process and compliance decisions are made by objective, competent decision-makers.
- **Defensible:** Compliance activities and supporting intelligence are accurate and support activities undertaken by the Commission.
- **Predictable:** Enforcement outcomes from compliance activities are fair and predictable under clearly understood conditions.
- **Risk-informed:** Compliance management processes are informed by risk, ensuring resources are used to the maximum effect.
- **Responsive:** All identified potential situations of non-compliance are examined and non-compliances are met with appropriate action and tracked until corrected.
- **Collaborative:** Business areas work together, share information and engage stakeholders, to ensure the CMS achieves performance expectations.
- **Adaptive:** Knowledge gained from compliance management processes, independent third-party observations and other sources will be used to systematically improve the CMS through a continuous improvement process.

Compliance Verification Activities

The Commission carries out several activities and business processes every year to assess whether or not regulatory requirements have been met by oil and gas permit holders. These activities include, but are not limited to, audits, inspections, administrative monitoring, as well as permit holder self-assessments. Annual Compliance Plan (ACP) documents include annual plans for audits and inspections, the results of which may inform adjustments or improvements to other verification processes.

- **Audit:** An independent, systematic and documented process to obtain and evaluate evidence to determine the extent to which audit criteria are fulfilled.
- **Inspection:** An on-site, compliance verification activity or process that involves the methodical examination and assessment of regulated activities or operations against requirements. May occur at any time during the life of a project.
- **Administrative Compliance Monitoring:** An office-based compliance verification procedure which may include any activity to track or assess compliance associated with operational submissions that must be provided to the Commission, including data, notices, reports or any other information required. Some administrative monitoring mechanisms may consist of or be aided by automated tools to identify alleged non-compliances, such as reports.
- **Permit holder self-assessment:** A compliance verification method carried out by permit holders, which uses a standardized approach pre-defined or sanctioned by the Commission to assess and/or report on compliance with a requirement.

ANNUAL COMPLIANCE PLAN DEVELOPMENT

The Annual Compliance Plan establishes the Commission's priorities and targets for inspections and audits for the coming fiscal year. The annual plan consists of an inspection plan and an audit plan, along with measurable targets against which quarterly and annual reporting can be carried out.

The Annual Compliance Plan is created using a cyclical Plan-Do-Check-Act process for continuous improvement.

Plan: Key inputs into the ACP are inspection selection and planning criteria and methodologies, audit planning schedules, results from previous ACP implementations, corporate-level risk registers and other strategic drivers.

Do: Includes the implementation of the annual inspection and audit plans.

Check: Includes quarterly and annual reporting related to the progress of plan implementation, identification of any key trends, and any recommended actions. This may also incorporate operational data and trends from the various compliance verification processes carried out at the business unit level.

Act: Involves responding to information obtained from the check phase – both quarterly and annually – to enhance performance to expectations. Some actions identified may be executed immediately upon observation, or as part of improvements prioritized within the next year's ACP.

ACP Component: Annual Inspection Plan

The Annual Inspection Plan identifies target or benchmark numbers of inspections to be completed from each inspection selection stream. Targets are established for selection streams where inspections are pre-planned. Benchmarks have been established for selection streams that are triggered by operational events, external requests, etc. Overall, the Commission completes in excess of 4,500 inspections annually.

The Commission's inspection selection and planning methodology is made up of several

selection streams based on several risk-based and operational drivers.

- **Data and Risk-Informed:** This stream selects inspections based on site characteristics, observed compliance trends and associated risk.
- **Event-Driven:** This stream selects inspections after operational events at oil and gas sites (notice of construction, pressure test, Leave To Open notices, etc.).
- **Responsive:** These include inspections requested by a business area within

the Commission or by an external party. This stream provides responsiveness to specific stakeholder interests or concerns, and identification of potentially emergent compliance trends.

- **Officer Selected:** These inspections are selected by officers based on an evaluation of inspection frequency, inspection coverage within an area, local knowledge and response to seasonal access into remote areas. As these inspections are often conducted alongside other planned inspections, they positively influence inspection efficiency by rounding out daily activities in a particular area.

Natural Resource Aboriginal Liaison Program

The Natural Resource Aboriginal Liaison Program (ALP) began in 2014 and is a partnership between Indigenous communities, the Commission and other natural resource agencies. The Commission inspection staff provide training, mentoring and joint inspections to liaisons who determine involvement levels while supporting community land priorities and values. Liaisons are provided technical training in numerous resource industry areas and bring that knowledge, along with the information they gain from their fieldwork, back to their communities. The Commission is committed to full participation in the ALP, supporting liaison involvement in monitoring oil and gas activities and ensuring participants are supported. The ALP is funded through the BC Oil and Gas Research and Innovation Society (OGRIS).

ACP Component: Annual Audit Plan

The Commission performs audits to assess the effectiveness of permit holders' program areas in accordance with specified audit criteria. Auditing is used to assess compliance with requirements, which are outside the scope of routine inspections and involves verifying adherence to specific criteria derived from requirements or regulations and looks at the overall method by which a risk is managed. Audits may also be broad-based, assessing industry trends or effectiveness of existing regulation.

The focus is on the processes and procedures used to meet specified criteria or requirements, and the overall effectiveness. The scale and scope of individual audits is based on the size and nature of the auditee as well as on the nature, functionality, complexity and the aspect of the area or system to be audited. This includes audits of single, multiple or integrated management system(s) or program areas conducted either separately or in combination.

ACP MONITORING AND RESULTS

The Commission tracks progress towards completion of planned activities in the ACP through preparation and review of quarterly and annual reports. These reports are reviewed by business unit leaders and all members of the Compliance Management Steering Committee.

After the completion of an ACP cycle, the Commission reviews and analyzes audit and inspection results to identify trends or findings that may inform changes to criteria used in planning future ACP activities.

TABLE 1: QUARTERLY AUDIT PROGRAM PERFORMANCE

Audit Program	Total Audits Planned (Fiscal)	Q1			Q2			Q3			Q4		
		In Progress	Completed	Status	In Progress	Completed	Status	In Progress	Completed	Status	In Progress	Completed	Status
Certificate of Restoration (COR) Audit Program	14	14	-	In Progress	14 ³	-	In Progress	-	14	Completed			
Dam Audit Program	4	4	-	In Progress	-	4	In Progress	-	4	Completed			
Emergency Management Competencies and Training	2	-	-	Not Started	-	-	Not Started	2	-	In Progress			
Environmental Mitigation Strategy (Stage Two) ¹	-	-	-	Deferred	-	-	Deferred	-	-	Deferred			
Facilities Integrity Management Program	17	-	8	In Progress	9	8	In Progress	4	13	In Progress			
Fugitive Emissions	29	6	23	In Progress	2	27	In Progress	-	29	Completed			
Heritage Conservation Audit Program ²	4	-	-	Deferred	-	-	Deferred	-	-	Deferred			
Pipeline Integrity Management Program	16 ⁴	-	8	In Progress	8	8	In Progress	4	12	In Progress			
Planning and Operational Measures (POMS)	6	-	-	Not Started	6	-	In Progress	6	-	In Progress			
Water Licences	10	-	-	Not Started	10	-	In Progress	-	10	Completed			

¹Due to changes with the Commission’s application approval process the core audit program is being reviewed, assessed, and potentially redeveloped during the next fiscal business planning.

²The audit program has been deferred due to work prioritization. Work is underway to ensure a complete program for next fiscal.

³Four additional sites added were added to the COR audit program.

⁴The number of Pipeline Integrity Management Program audits was reduced by one due to a permit holder ceasing operations.

Audit Status	Description
Cancelled	Audit program has been cancelled
Completed	Audit program objectives are complete (does not include corrective actions phase)
Deferred	Audit Program has been deferred to next fiscal
In Progress	Audit program has been initiated and is on track
Not Started	Audit program is planned but not yet initiated
Under Review	Audit program is experiencing delays, resource constraints or other challenges

TABLE 2: QUARTERLY INSPECTION PROGRAM AREA PERFORMANCE

				Annual Compliance Plan Implementation vs Targets and Benchmarks									
				Q1 Reporting		Q2 Reporting		Q3 Reporting		Q4 Reporting		Year-to-Date Summary	
Inspection Program	Target / Benchmark	Annual Target / Benchmark	Quarterly Target / Benchmark	Number Completed	+/- Quarterly Target / Benchmark	Number Completed	+/- Quarterly Target / Benchmark	Number Completed	+/- Quarterly Target / Benchmark	Number Completed	+/- Quarterly Target / Benchmark	Number Completed	+/- Annual Target / Benchmark
Data & Risk Informed	Target	2,800	700	645	(55)	1,129	429	767	67		(700)	2,541	(259)
Event Driven	Benchmark	50	13	7	(6)	11	(2)	15	3		(13)	33	(17)
Officer Selected	Benchmark	1,500	375	252	(123)	391	16	187	(188)		(375)	830	(670)
Responsive	Benchmark	100	25	9	(16)	20	(5)	12	(13)		(25)	41	(59)
Quarterly Inspection Summary		-	1,113	913	(200)	1,551	439	981	(132)	-	(1,113)	3,445	

Data & Risk Informed Inspection Performance		Q1 Reporting		Q2 Reporting		Q3 Reporting		Q4 Reporting		Year-to-Date Summary	
Cumulative Year-to-Date Data & Risk Informed Inspection Summary		645		1,774		2,541		2,541		2,541	
Annual Inspection Planning Target: greater than 90% completion of Data & Risk Informed inspections		92.1%	Successful	161.3%	Successful	109.6%		0.0%		91%	
Target of greater than 60% of the annual inspection plan will be Data & Risk Informed		70.6%	Successful	72.8%	Successful	78.2%		-		74%	

The Data & Risk Informed inspection plan is developed with a surplus of candidate inspection sites to address the variable nature of seasonal access in the northeast. As a result, the inspection selection stream may deliver more than 100 per cent on annual inspection planning targets. Additionally, planned inspections may be added during a cycle increasing the number completed.

This report was published January 2023.
