

Quarterly Oil and Gas Water Management Summary

Fourth Quarter 2016 (October - December)

PURPOSE

This *Quarterly Oil and Gas Water Use Summary* presents short-term water use and water licence data from the Q4 October to December 2016 period.

Previous annual water use reports and quarterly water use summaries are available on the BC Oil and Gas Commission website at www.bcogc.ca.

BC OIL AND GAS COMMISSION

The [BC Oil and Gas Commission](#) (Commission) is the provincial regulatory agency with responsibilities for regulating oil and gas activities in British Columbia, including exploration, development, pipeline transportation and reclamation.

The Commission's core services include reviewing and assessing applications for industry activity, consulting with First Nations, cooperating with partner agencies, and ensuring industry complies with provincial legislation and all regulatory requirements. The public interest is protected by ensuring public safety, respecting those affected by oil and gas activities, conserving the environment, and ensuring equitable participation in production.

The Commission is responsible for reviewing, assessing, and making decisions on water authorizations from both surface and subsurface water sources. The Commission has the expertise and tools to make informed water allocation decisions, and protecting and maintaining environmental and community water needs are its first priorities.

HOW WATER IS USED

Water is used for various purposes in the oil and gas industry.

The largest use of water for oil and gas activities is for hydraulic fracturing.

However, water is used for other purposes, such as:

Seismic or geophysical exploration

Drilling

Machine washing

Dust control

Water floods (to enhance oil recovery)

Ice road freezing

Hydrostatic testing of pipelines

HOW WATER IS ACCESSED

There are different ways the oil and gas industry may access water in British Columbia. Some methods are managed through provincial legislation, including:

- **Water licences** issued under the Water Sustainability Act (WSA) for surface and groundwater. The Commission has staff designated as Regional Water Managers with authority for issuing and administering long-term water licences.
- **Short-term surface water use or diversion approvals** issued under Section 10 of the WSA. Short-term water use is administered by the Commission.
- **Water source wells** authorized by the Commission under the Oil and Gas Activities Act (OGAA). Water source wells are a specific type of well where the water withdrawn is intended for injection into an underground formation to enhance oil or natural gas recovery.
- **Flowback water** that returns to the surface after being injected for hydraulic fracturing.
- **Produced water** that flows to the surface as a by-product of oil and gas production.

The oil and gas industry can access water by means outside of regulatory oversight:

- **Private agreements** can be made with landowners or others who have a source of surface water supply such as a dugout or a groundwater well. In some cases, private agreements may require a Waterworks water licence under the WSA.

LONG-TERM WATER LICENCES AND USE

At the end of the fourth quarter of 2016, there were 21 active oil and gas related water licences, representing 37 withdrawal locations, held by 10 companies (Table 1).

The total annual licenced water volume was 17,825,759 m³.

A total of 862,790 m³ of licenced water was reported as withdrawn for the year (Table 1).

During the fourth quarter 2016, three companies withdrew water by way of water licences, totalling 167,789 m³ (Table 2).

A break-down of water licence allocation and use by OGC Water Management Basin is listed in Table 4.

TABLE 1 - SUMMARY OF WATER LICENCE AND USE FOR OIL AND GAS ACTIVITIES FROM JANUARY TO DECEMBER 2016

		Q1	Q2	Q3	Q4
WATER LICENCE	Companies with Active Water Licences	7	10	10	10
	Active Water Licences	16	21	21	21
	Licensed Withdrawal Locations	31	37	37	37
	Annual Volume Available for Use for Water Licences (m ³)	15,548,135	17,825,759	17,825,759	17,825,759
	Cumulative Volume Reported Used in 2016 (m ³)	287,680	403,609	695,001	862,790

TABLE 2:
OIL AND GAS RELATED WATER LICENCES THAT WITHDREW WATER FROM OCTOBER TO DECEMBER 2016

LICENCE #	LICENCEE	SOURCE	OGC WATER MANAGEMENT BASIN	ANNUAL APPROVAL (m ³ /YR)	Q4 WATER USE (m ³ /YR)
C112155	Whitecap Resources	Peace River	Lower Peace River	1,825,000	137,835
C132688	Canadian Natural Resources Limited	Charlie Lake	Lower Beaton River	394,000	15,128
C133155	Canbriam Energy Inc.	Williston Lake	Peace Arm	3,650,000	14,826

SHORT-TERM WATER APPROVAL AND USE

At the end of the fourth quarter of 2016, there were a total of 278 short-term water use approvals in place, representing 746 withdrawal locations, held by 44 companies (Table 3).

The total water volume associated with short-term approvals that were active on the last day of the quarter was 8,905,774 m³.

A total of 798,752 m³ was reported as withdrawn by oil and gas operators during the 2016 year (Table 3).

A break-down of short-term water approval and use by OGC Water Management Basin is listed in Table 4.

TABLE 3 - SUMMARY OF SHORT-TERM APPROVAL AND USE FOR OIL AND GAS ACTIVITIES FROM JANUARY TO DECEMBER 2016

	Q1	Q2	Q3	Q4
SHORT-TERM Companies with Active Approvals	39	46	41	44
Active Approvals	162	202	227	278
Approved Withdrawal locations	753	749	653	746
Volume Available for Use (m ³)	9,347,183	10,903,248	8,761,992	8,905,774
Cumulative Volume Reported Withdrawn (m ³)	269,564	484,338	701,548	798,752

WATER SUSTAINABILITY ACT

The Water Sustainability Act (WSA) came into effect on Feb. 29, 2016, resulting in changes to surface water and groundwater allocation processes by the Commission. With the implementation of the WSA, the following regulations were created or revised and brought into force:

- Water Sustainability Regulation (replaces Water Regulation)
- Groundwater Protection Regulation (revised)
- Dam Safety Regulation (revised)
- Fees, Rentals and Charge Tariff Regulation (new)

The WSA modernizes the language of the Water Act and introduces a number of significant policy changes. Examples of key items that affect oil and gas activities include, but are not limited to:

- Water in a stream, and the percolation and flow of groundwater, are vested to the Crown.
- The regulatory scheme for the diversion and use of stream water is maintained and applied to both stream water and aquifer water.
- The rights of prior appropriation are retained – First In Time, First In Right (FITFIR).
- The consideration of the environmental flow needs of a stream in licensing decisions is mandated for all water allocation decisions related

to streams, and to aquifers “reasonably likely” of being hydraulically connected to a stream.

- Explicit notification, objection and appeal rights for short-term water use approvals and changes in and about a stream are specified (appeals are to the Environmental Appeal Board).
- Deep groundwater is exempted from the requirement for a water licence.
- New powers are created to be applied when streams are at risk of falling or have fallen below their critical environmental flow thresholds, to modify the existing precedence of water use for the purpose of protecting the aquatic ecosystem of streams and aquifers

and essential domestic uses (i.e., FITFIR can be overridden).

- Authority is provided to statutory decision makers to require environmental mitigation or offsetting when the diversion and use of water, or changes in and about a stream, are likely to have a significant adverse impact on the water quality, water quantity or aquatic ecosystem of a stream or aquifer.

As there are significant changes resulting from the implementation of the WSA, operators are strongly encouraged to review the document [Water Sustainability Act Applications Support for Operators](#). This supplemental outlines material changes to application manuals,

processes and fees, short-term water use approvals, water licensing, and the aforementioned regulations.

The WSA and its regulations may be viewed online:

[Water Sustainability Act](#)

[Water Sustainability Regulation](#)
