Brittany Jorgensen, P.Eng.
Exploitation Engineer
Canadian Natural Resources Limited
Suite 2100, 885 – 2nd Street SW
Calgary, Alberta, T2P 4J8

Dear Ms. Jorgensen,

**RE: OBSERVATION WELL STATUS APPROVAL
ANNUAL PRESSURE TESTING EXEMPTION
CNRL ET AL PEEJAY d-3-E/94-A-16 (WA# 1732)
PEEJAY – HALFWAY – CNRL UNIT #2**

The Drilling and Production Regulation, Section 73(2) states: *Subject to subsection (6), a well permit holder must ensure that the static bottom hole pressure of each of the permit holder's producing pools, observation wells and water source wells accessing deep groundwater is measured once every calendar year.*

CNRL et al Peejay d-3-E/94-A-16 (WA# 1732) was granted Observation Well designation on February 8, 2021, with the requirement to conduct a reservoir pressure test every second year, with the first to occur in 2021. In conjunction with the designation conditions, biennial pool pressure testing of the observation well CNRL et al Peejay d-3-E/94-A-16 (WA# 1732) is hereby granted under section 4(1)(z) of the Drilling and Production Regulation.

Should additional reservoir pressure tests be conducted in the well in the future, a copy of the results along with any analysis must still be submitted as per Section 73(3) and 73(4) of the Regulation. This approval may be modified or rescinded at a future date.

Should you have any questions, please contact Kathryn Archibald at (250) 419-4406 or the undersigned at (250) 419-4430.

Sincerely,

Ron Stefik, Eng. L.
Supervisor, Reservoir Engineering
Oil and Gas Commission
