Dear Mr. Piercey:

**RE: PRODUCED WATER DISPOSAL SPECIAL PROJECT CANCELLATION
TERVITA W STODDART 10-14-87-21 (WA #2777)
STODDART WEST FIELD - HALFWAY FORMATION**

The subject well was drilled in 1970 and produced gas from the Belloy formation from April 1975 to February 1986. The well was completed in the Halfway formation in 1986 and the formation was approved for disposal on September 2nd, 2002. The Halfway was used for disposal from March 2003 until November 2012 with 329,000 m³ of cumulative disposal volume, when the formation storage pressure limit ceased further operation. Halfway pressures were monitored over a period of 3 years but the pressure did not decline below the storage limit, and so the zone was abandoned. In November 2016 the North Pine formation was re-completed and approved for disposal on July 4th, 2018, which remains in effect. On November 12th, 2020, Tervita Corporation indicated to the Commission via email that they had no plans for further disposal operations in the Halfway formation and concurred that cancellation of the approval is appropriate.

Pursuant to the *Oil and Gas Activities Act (OGAA)* section 75(2)(b), the Commission may cancel, suspend or amend a designation (iii) if the Commission considers that the designation is spent, or (iv) if the Commission considers that the designation is no longer appropriate, including, without limitation, for reasons of (a) public safety, (b) protection of the environment, or (c) conservation of petroleum and natural gas resources.

The Special Project Approval 02-02-012 for the Stoddart West field, Halfway formation well Tervita W Stoddart 10-14-87-21 (WA# 2777) is hereby cancelled under section 75(2)(b) of OGAA. In accordance with Section 75(2)(b)(iii), the Commission considers that the designation is spent.

Should you have any questions, please contact Logan Gray at (250) 419-4465 or the undersigned at (250) 419-4430.

Sincerely,

Ron Stefik, Eng. L.
Supervisor, Reservoir Engineering
Oil and Gas Commission
