Calgary, Alberta T2G 0R1

Dear Mr. Piercy:

**RE: PRODUCED WATER AND NON-HAZARDOUS WASTE DISPOSAL
HYDRAULIC ISOLATION TEMPERATURE LOG DEFFERAL
TERVITA FT ST JOHN SE 15-5-83-17; WA# 8130
CADOMIN FORMATION**

The Commission has received Tervita's request, dated April 15, 2018, for deferral of the hydraulic isolation temperature due to the inability to inject sufficient fluid to complete the log at this time. Tervita is currently evaluating options to remediate or suspend the well and has requested deferral of the hydraulic isolation temperature log until the well has been remediated.

The hydraulic isolation temperature logging requirement outlined in condition 2k)ii) of Order 94-02-002, Amendment #2, is hereby deferred until October 31, 2019. The hydraulic isolation temperature must be submitted to the Commission, via eSubmission, within 30 days of the run date.

Should you have any questions, please contact Kathryn Archibald at (250) 4419-4406 or the undersigned at (250) 419-4430.

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Stefik', written over a horizontal line.

Ron Stefik, Eng.L.
Supervisor, Reservoir Engineering
