Dear Mr. Marsden:

*BHP Project  
(3)*

APPLICATION FOR GAS INJECTION SCHEME  
CECIL LAKE-CECIL "A" POOL

This refers to your application of June 14, 1989, requesting approval to reinject produced gas in the subject pool.

No objections were received following the publication of a notice of this application in the British Columbia Gazette of July 20 and 27, 1989. Accordingly, this is to advise that, under Section 116 of the Petroleum and Natural Gas Act, approval is hereby granted for produced gas reinjection subject to the following conditions:

1. The project area of the gas injection scheme is Section 6-85-17 W6.
2. The project daily oil allowable will be 44.2 m<sup>3</sup>. This allowable is based on presently recognized reserves under the project area and recognizes improved recovery.
3. Produced gas will be injected into the well 6-6-85-17 W6.
4. All produced gas in excess of that required for lease fuel will be injected. All such gas injection will be deducted from produced gas in calculating gas-oil ratios for oil allowables.

Mr. Gordon W. Marsden

5. Periodic comprehensive progress reports will be required as stipulated under Division 104 of the Drilling and Production Regulation.
6. The operations of the gas injection scheme will be subject to periodic review and modification to the approval may be ordered, if deemed appropriate, by the Director, Engineering and Operations.

Yours sincerely,

Original Signed By  
MINISTER

Honourable Jack Davis  
Minister
