October 17, 1975

Mr. D.W. Hess,  
Consulting Petroleum Engineer,  
2820 Murray Drive,  
Victoria, B.C.

Dear Sir,

Re: Coseka et al Gundy d-2-G/94-B-16

With reference to your letter of October 15, 1975, approval is hereby granted for gas production from the Baldonnel and Cadomin-Nikanassin zones to be commingled in the above captioned well. The Branch recognizes the very limited nature of the Cadomin-Nikanassin reservoir and agrees that none of the production should be allocated to this zone.

It is understood that this approval is subject to change if warranted by new geological, reservoir or production information.

Yours truly,

AGTW/sm

A.G.T. Weaver,  
Chief Engineer
