North Pine and Belloy Reservoirs

WA 4013?

*one or two allowable ✓
100% off surface?
reclaim just - modified make
of set to gas
clear of set - be
dis. full change*

This will acknowledge receipt of your application dated 1979 08 01 requesting permission to produce the North Pine and the Belloy reservoir and co-mingle production on surface from the Ipex et al North Pine 6-22-85-18 well. Your application to co-mingle production on surface is hereby approved subject to the following conditions:

1. Production should be allocated to the appropriate reservoir on the BC S-1 forms as proposed in your letter.
2. This approval may be modified or rescinded if deemed necessary by the Branch at any time.

Enclosed please find our approval for a Daily Gas Allowable of $60 \times 10^3 \text{ m}^3$ for the Belloy pool. In view of the G.O.R. of the North Pine reservoir the Branch regards this as a gas reservoir, consequently an interim Daily Gas Allowable of $60 \times 10^3 \text{ m}^3$ is approved for the North Pine 'C' pool. An application for a Daily Gas Allowable for the North Pine pool should be submitted at your earliest convenience.

Yours truly,

A.G.T. Weaver
Chief Engineer
