Dear Mr. Li:

**ALLOWABLE REVISION: CONCURRENT PRODUCTION SCHEME
SECTION 24-85-14W6 -- BOUNDARY LAKE - HALFWAY**

This acknowledges receipt of your application dated November 17, 1989, requesting revised oil and gas allowables for the concurrent production scheme from the Halfway formation within section 24-85-14W6.

A geological update of the Halfway pools was carried out as a result of recent drilling of wells 4-24 and A14-13-85-14W6. For this reason, the project allowables have been revised. Consequently, conditions #2 and #3 of our approval dated March 21, 1984, are revised as follows:

- #2 The oil allowable for the area, based on volumetric oil reserves within the pools Halfway 'E' and 'F', is 24.5 m³/d.
- #3 The gas allowable for the area, based on volumetric gas reserves within the pools Halfway 'A', 'E' and 'F', is 34.4 10³m³/d. (Gas R = 1104 w/w³)

All other conditions of the original approval remain unchanged.

Yours sincerely,

B.E. Hanwell
