Calgary 1, Alberta.
T2P 0J3

Attention: Mr. L. R. Miskew.

Dear Sir:

Re: Concurrent Production, Inga Unit No.1

Further to recent discussions between your Mr. R. W. Stanich and our Mr. A. J. Dingley, this will confirm that modifications have been made to condition (c) of the approval to produce gas from the 'central' gas cap in Inga Unit No.1 (dated September 16, 1971).

Effective immediately, we will no longer require details on a monthly basis of the water injection allocated to replacement of withdrawals from this gas cap. We will, however, continue to require details of such allocations to be included in the annual progress reports required under the original waterflood approval.

Yours truly,

J. D. Lineham,
Chief,
P. & N. G. Branch.
