Dear Mr. Thurmeier:

**RE: MODIFICATION TO CONCURRENT PRODUCTION
FLATROCK WEST HALFWAY "D" POOL**

This acknowledges receipt of your application dated November 18, 1992, requesting modifications to the concurrent production approval in the subject pool by enlarging the area and assigning a higher gas allowable.

A concurrent production approval for section 34-84-17 W6M of the Flatrock West Halfway "D" pool was granted on March 22, 1989, and revised to account for infill drilling within the project area on March 22, 1990. As OGY Petroleum has now purchased the mineral rights of Section 3-85-17 W6M, conditions #1 and #3 of the concurrent production approval are further modified as follows:

1. The area of approval is Section 34-84-17 W6M and Section 3-85-17 W6M.
3. Gas production from the area, based on volumetric gas cap reserves, is 75 e3m3/d.

All other conditions of the original approval remain unchanged.

Yours sincerely,

[Signature]
Bou van Oort
