

Ref. No. 90364

March 20, 1990

Mr. W. Wolodarsky
OGY Petroleums Ltd.
904 - 675 West Hasting Street
Vancouver, British Columbia
V6B 1N2

Dear Mr. Wolodarsky:

**ALLOWABLE REVISION, CONCURRENT PRODUCTION SCHEMES
SECTION 34-84-17 W6; FLATROCK WEST HALFWAY "D" POOL**

This acknowledges receipt of your application dated February 21, 1990, requesting revised allowables for the subject schemes.

A concurrent production approval was granted for section 34-84-17 W6 on March 22, 1989. A geological update of the Halfway "D" pool was carried out as a result of the recent drilling of oil wells 1-34 and 14-34-84-17 W6. For this reason, the project allowables have been revised. Consequently, conditions #2 and #3 of the original approval of March 22, 1989, are hereby revised as follows:

2. The daily oil allowable for the area, based on reserves, is 79.6 m^3 .
3. Gas production from the area, based on volumetric gas cap and solution gas reserves, will be limited to $36.2 \cdot 10^3 \text{ m}^3$.

All other conditions of the original approval remain unchanged.

Yours sincerely,

B.E. Hanwell
