Attention: Miss D. C. Gibbs
Reservoir Engineering Dept.

Dear Miss Gibbs:

RE: Concurrent Production - Eagle Belloy 'D' Pool
Scurry CanPlac Eagle 6-34-84-18
Scurry Murphy Eagle 6-3-85-18
Scurry Murphy Eagle 6-10-85-18

The Branch approved a concurrent production scheme for the 6-34-84-18, 6-3 and 6-10-85-18 wells completed in Belloy 'D' pool on 1979 01 09. However, based on the current Branch interpretation these wells are now considered to be located in the Eagle Belloy 'F' pool. It follows that the concurrent production scheme approval will have to be discontinued to protect the interest of operators in the Eagle 'F' pool.

In view of this, we plan to rescind the approval effective 1981 04 01. However, any comments or new information which could effect our interpretation, would be welcome before this date.

rescinded effective 1981 04 01/RA

Yours truly,

A. G. T. Weaver
Chief Engineer
Petroleum Resources Branch
