Suncor Project (02)

Dear Mr. Lutes:

APPLICATION FOR CONCURRENT PRODUCTION
LAGARDE-DUNLEVY "B" POOL

This refers to your application of January 26, 1990, requesting concurrent production approval from the subject pool.

The Division's geological and engineering interpretation is very similar to the one presented by your company. The pool has been delineated with the drilling of infill wells and it is agreed that oil recoveries cannot be improved significantly by gas injection because of the risk of gas coning due to high vertical permeabilities.

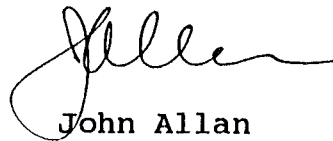

Notice of your application was published on February 22 and March 1, 1990, in the British Columbia Gazette. As no written objections were received, Suncor Inc., as operator, is hereby given approval under section 113 of the Petroleum and Natural Gas Act to produce oil and gas concurrently under good engineering practice from the Dunlevy "B" pool of the Lagarde field subject to the following terms and conditions:

1. The area of approval is sections 20, 28 and SE 1/4 29-87-15 W6M. (*Lsds 1, 2, 7, 8*).
2. The daily oil allowable for the area, based on the sum of the individual allowables, is 47.2 m³.

Mr. Byron C. Lutes
March 20, 1990
Page 2

3. Gas production from the area will be limited to $40 \times 10^3 \text{ m}^3/\text{d}$.
4. All gas production will be conserved.
5. The effective date of the approval will be the date the Division is advised of the completion of the gas conservation facilities. *
6. The approval is subject to periodic review and may be modified at a later date by the Director, Engineering and Operations, if deemed appropriate through a change in circumstances.

Yours sincerely,

John Allan
Assistant Deputy Minister
Energy Resources Division

APPLICATION FOR CONCURRENT PRODUCTION, LAGARDE DUNLEVY "B" POOL

Dear Mr. Attariwala:

Pursuant to the British Columbia Government's response of March 20, 1990, to Suncor's subject application, this letter confirms that construction of the gas conservation facilities has been completed. This satisfies condition 5 of the March 20 response.

facilities completed & operational October 13/90. SA.

Sincerely,

Brian Morse, P.Eng.
Reservoir Engineer
