Dear Mr. Moore:

**RE: Modification to Concurrent Production Scheme
Flatrock - Halfway 'E' Pool**

This refers to your application dated December 9, 1991, requesting a daily oil allowable for the well Wainoco Flatrock 14-14-84-17 (W.A.# 6375).

A concurrent production scheme was approved for sections 17 and 18-84-16 and sections 13 and 14-84-17, effective October 16, 1978, with amendments in 1981 and 1984. The subject of a proposed well being drilled in the 14-14-84-17 location was addressed by the Ministry in a letter dated March 20, 1984, see copy attached.

In order to clarify the conditions of this concurrent production scheme, following the numerous revisions, they are listed as follows:

1. The area of the concurrent production scheme consists of sections 18-84-16 and sections 13 and 14-84-17.
2. The daily oil and gas allowables of each well are as follows:

<u>Well</u>	<u>Oil Allowable (m³/d)</u>	<u>Gas Allowable (10³ m³/d)</u>
6-18-84-16	0	56.3
6-13-84-17	11.2	combined { 40.5
16-13-84-17	0	
10-14-84-17	13.0	11.6
14-14-84-17	18.9	16.8

3. Gas production will be conserved.
4. This approval may be modified at a later date if deemed appropriate through a change in circumstances.
