Re: Conversion to Water Disposal  
b-42-F/94-G-1

This is to approve conversion of the subject well for water disposal services. The conversion should be as presented in the application of June 8, 1970, so that water from the Beg Field central site is disposed of into the openhole completion across the Halfway zone.

In view of the erratic reservoir pressure data obtained from the Halfway pool to date and the complete lack of it in the vicinity of b-42-F, a static bottom-hole pressure should be obtained in the proposed disposal well prior to starting water injection.

Approval is effective immediately; terms may be modified at a later date if deemed necessary.

Yours truly,

J. D. Lineham  
Chief  
Petroleum & Natural Gas Branch
