Attention: Mr. B.R. Branch

Dear Sir:

Re: Application for Good Engineering Practice  
West Flatrock - Halfway 'C' Pool

*(Conoco)  
GEP Project (2)*

This refers to your application dated 1987 08 12 requesting approval to produce gas under Good Engineering Practice from the well Oil et al W Flatrock 6-12-85-17 W6 completed in the West Flatrock Halfway 'C' pool.

The Division's geological interpretation indicates that wells 10-1, 6-12 and 6-13-85-17 W6 have penetrated the Halfway 'C' pool with only 6-12 well completed for gas production at this time. The well 10-1 has been abandoned due to the thick water leg beneath the gas zone and the well 6-13 is slated for abandonment soon because of uneconomic flow rates.

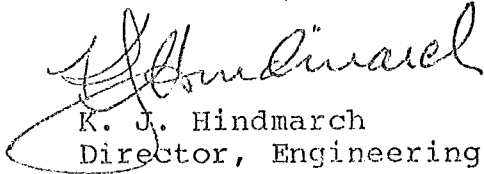

Notice of your application was published in two issues of the British Columbia Gazette. As no written objections were received by September 3, 1987, your application is hereby approved subject to the following conditions:

1. The area of Good Engineering Practice consists of Sections 1 and 12-35-17 W6.
2. The daily gas allowable for the area is 119.0  $10^3 \text{m}^3/\text{d}$ .
3. This approval could be modified at a later date if deemed appropriate through a change in circumstances.

Page 2

The protection of equity for leaseholders bordering the GEP area is a prime consideration for the Division. Therefore, a lower gas well allowable may be imposed on well 6-12 if a gas well is completed in the same pool but outside of the GEP area.

Yours truly,
