Dear Mr. Eckert:

**RE: APPLICATION FOR APPROVAL FOR A GOOD ENGINEERING PRACTICE AREA  
FLATROCK WEST CECIL "A" POOL**

This acknowledges receipt of your application dated July 20, 1995, requesting removal of all allowables and GOR penalties under a Good Engineering Practice scheme approval for the subject pool. Included with the application was a reservoir simulation study conducted by Can Tek Projects Inc.

We wish to advise that your application cannot be approved at this time. The pool appears to have good potential for secondary recovery. However, no effort was made to investigate potential oil recovery from the pool under a gas injection or a waterflood pressure maintenance scheme. The reservoir simulation study by Can Tek concentrated on primary depletion of the pool with and without GOR penalty restrictions.

Additionally, the correlative issues in the pool were not appropriately addressed in the application.

If you have any questions, please contact Peter Attariwala at (604) 952-0311.

Yours sincerely,

B. van Oort, P.Eng.  
Acting Director  
Engineering and Operations Branch
