Attention: Mr. J.G. Goemans

Dear Sir:

Re: Application for Good Engineering Practice
West Nat et al Yoyo a-74-H/94-I-13

This will acknowledge receipt of your application of July 29, 1974 requesting removal of gas well rate restrictions for the subject well producing from the Slave Point and Pine Point zones of the Yoyo Field.

Please be advised that your application has been advertised in the British Columbia Gazette of 5th and 12th September 1974, a copy of which is attached.

During a preliminary review of your application, it was discovered that

a) with regards to your remarks relating to equity problems, pg. 3, section (m), subsection 4), the well has been continuously overproducing its approved PRL and

b) a second modified isochronal test has not been conducted on the well despite our reminders of June 10, 1971 and June 11, 1973.

Before we act further on this application, we would like to receive your comments on the above.

Yours truly,

A.J. Dingley,
Chief Engineer
