Dear Mr. Evans:

RE:

GOOD ENGINEERING PRACTICE SPECIAL PROJECT

OTHER THAN NORMAL SPACING ORDER UMBACH FIELD - MONTNEY "A" POOL

The Commission has reviewed your application, dated February 12, 2013, requesting a Good Engineering Practice approval for an area within the Umbach field – Montney formation.

The application is intended to extend successful development of the Montney formation as gas recovery from this resource benefits from the ability to produce horizontal wells in optimal locations. Gas target buffer distances have been reduced to 150 meters on various project boundaries specified in the attached approval based on documentation of consent from off-setting rights owners. For regulatory purposes, the Commission designates the entire Montney sequence as a single formation, removing commingling as an issue.

This approval area includes 12 spacing units and is 2 NTS units to the south of GEP Order 13-06-004.

The following Orders are attached;

- 1) Order 13-06-005 designating Good Engineering Practice within a portion of the Umbach Montney "A" pool as a Special Project under section 75 of the *Oil and Gas Activities Act*, and
- 2) Order 13-06-005-OTN approving Other Than Normal Spacing under section 65.1 of the *Petroleum and Natural Gas Act* for the subject formation and area.

Should you have any questions, please contact Ron Stefik at (250) 419-4430 or Michelle Gaucher at (250) 419-4482.

Sincerely,

Richard Slocomb, P.Eng
