Attention: Chief Petroleum Engineer.

Dear Sir:

Re: Inga Unit #2

With reference to telephone conversation A.J. Dingley/
Clyde VanClutson of June 15, 1973, this will confirm that we
approve in principle the utilisation of the well BP et al
16-13-86-24 for water injection.

Prior to working over this well to place it in a con-
dition suitable for water injection, "Application to Alter
a Well" forms should be submitted to our Development Section.

Your truly,

A. J. Dingley,
Senior Reservoir Engineer.
