*Canhunter Brassey Project #1 (02)
Amendment #12*

Dear Ms. McClernon:

**RE: APPLICATION TO AMEND PRESSURE MAINTENANCE APPROVAL
BRASSEY ARTEX "A", "B", "D" AND "G" POOLS**

The Commission has reviewed your application dated March 4, 2002 wherein you requested an amendment to the pressure maintenance approval for the Brassey Artex "B" pool.

We would like to thank you for your technical presentation in Victoria on March 4, 2002.

The performance of the pool has followed the reservoir model prediction. It is concluded that the oil recovery from the Brassey Artex "B" pool will not be adversely impacted by reduced operating pressure. Accordingly, we concur with your proposal to reduce the Brassey Artex "B" pool operating pressure from 12,000 kPa to 5,000 kPa. Consequently, condition #6 of the pressure maintenance scheme by gas reinjection granted under section 116 (now section 100) of the Petroleum and Natural Gas Act on June 29, 1989, subsequently amended on April 6, 1990, February 20, 1991, September 2, 1993, February 8, 1994, December 10, 1997, July 29, 1998, May 10, 2000, June 20, 2000, January 16, 2001, February 12, 2001 and October 25, 2001 is hereby amended as follows:

- 6. Average reservoir pressure will be maintained above 5,000 kPa in "B" pool, above 20,000 kPa in "D" pool and above 50 kPa in "G" pool.

All other conditions of the approval remain unchanged.

Sincerely,

Craig Gibson, P. Eng.
Manager
Reservoir Engineering and Geology
