Ms. Lucy Rock
Junior Petroleum Engineer
Canadian Hunter Exploration Ltd.
2800, 605 - 5th Avenue SW
Calgary, AB T2P 3H5

Dear Ms. Rock:

**RE: APPLICATION TO AMEND PRESSURE MAINTENANCE APPROVAL
BRASSEY ARTEX "A", "B", "D" AND "G" POOLS**

This is in response to your application dated July 20, 1998, wherein you requested that the approval be amended to allow conversion of d-89-B/93-P-10 into an injection well.

Your proposal to complete the d-89-B as an injection/producer is considered appropriate as it may improve the ultimate recovery of oil from this single well pool. Consequently, condition #2 of the pressure maintenance scheme by gas reinjection granted under section 116 (now section 100) of the Petroleum and Natural Gas Act on June 29, 1989, subsequently amended on April 6, 1990, February 20, 1991, September 2, 1993, February 8, 1994 and on December 10, 1997 is hereby amended as follows:

2. All produced gas in excess of that required for lease fuel will be injected into the gas injection wells. Produced gas may be injected into the following wells:

Pool "A": d-89-B/93-P-10

Pool "B" : d-13-F, c-34-F, d-93-C and d-55-F in 93-P-10 and 13-1-77-19 W6M.

Pool "D" : d-A71-C and a-82-C in 93-P-10.

Pool "G": d-93-C/93-P-10

Additional and alternate injectors or producers may be approved on application.

All other conditions of the Ministry approvals remain unchanged.

Please note that BC 11 form must be submitted each time the well d-89-B starts on the injection or production cycle.

Yours sincerely,

Bou van Oort, P. Eng.
