Dear Mr. Gill:

**RE: PRESSURE MAINTENANCE WATERFLOOD
INGA FIELD – INGA “A” POOL UNIT #4**

The Commission is presently reviewing and amending waterflood approvals to conform to current requirements. The waterflood project in the Inga field, Inga ‘A’ pool, Unit #4, approved on May 9, 1972, has been reviewed by Commission staff. Table 1 lists the completed wells in the subject project. Commission records for the project indicate that injection ceased in May of 1992 and all wells are either downhole or surface abandoned. On January 20th, 2020, Canadian Natural Resources Ltd. concurred with Commission staff via email that cancellation of the waterflood approval is appropriate.
