Dear Ms. Mactaggart:

**RE: AMENDMENT TO PRESSURE MAINTENANCE APPROVAL
PEEJAY UNIT # 2, HALFWAY POOL**

This refers to your applications dated February 22 and February 23, 2000 wherein you requested an amendment to the waterflood pressure maintenance scheme approval in the Peejay Halfway Unit #2. In the applications you propose to recompleate wells CNRL et al Peejay b-68-C/94-A-16 (WA 6407) and CNRL et al Peejay a-2-E/94-A-16 (WA 2821) to water injectors.

The well b-68-C has been shut-in since January 1999 due to low productivity after producing 78,508 m³ of oil. Also, the well a-2-E watered out and has been shut-in since July 1976 after producing 14,277 m³ of oil. We concur with your requests and conclude that completion of these wells as water injectors will effectively sweep the reservoir and recover bypassed oil. Therefore, we wish to advise that your applications to convert b-68-C and a-2-E as water injection wells are hereby approved.

Yours sincerely,

B. van Oort, P. Eng.
