Dear Sir:

Re: Crush Unit No. 1 - Waterflood modifications.

With reference to your letter of March 28, 1974 this will advise that approval to inject water into the well in d-69-F/94-A-16 is hereby given effective March 1st. 1974.

We must point out that an approval from our Charlie Lake Field office relates solely to the physical conversion of a well and that approval for the injection of water into a well must be obtained from Victoria prior to injection commencing. We would be grateful if you would ensure that all your staff involved are made aware of and adhere to this procedure in future.

Yours truly,

A. J. Dingley,
Chief Engineer.
