Re: **SUSPENSION OF WATER INJECTION**  
**INGA UNIT 4, INGA 'A' POOL**

Further to conversation with Mr. R. Stefik of your office on July 30, 1992, please be advised that Texaco Canada Petroleum Inc. permanently suspended the Inga Unit 4 waterflood on May 28, 1992 as the injection flowline failed.

Confirmation of the Unit allowable reverting to a primary level of 66.5 m3 OPD from the current 117.6 m3 OPD would be appreciated.

Should you have any questions on this matter, please contact Mr. Bruce MacTavish or the undersigned at (604) 785-6667.

Yours very truly,

  
(R.C.)  
R.C. Dunbar  
Area Engineer
