

Report Name

List of Orphan Sites

Report Description

This report lists all designated orphan sites (individual pad sites), each of which may contain well(s), facility equipment, and/or pipeline segments. The status of decommissioning and restoration progress is provided

Measures and Definitions

1. Site Type – Indicates whether the site contains one or more wells, or in the case where no well(s) are present, only facility or pipeline equipment.
2. Inactive – Decommissioning work remains at the site.
3. Decommissioned – All well(s) and facility equipment have been permanently plugged and/or removed from the site, allowing for restoration work to progress.
4. Assessed – Indicates a site has been decommissioned and an investigation completed to confirm the environmental quality before reclamation
5. Reclaimed – Decommissioning work is complete and the surface soils have been reclaimed for planting or all reclamation work, required monitoring, and issuance of Certificates of Restoration have been completed, where applicable.

12/7/2022

Report Name

List of Wells on Orphan Sites

Report Description

This report lists the wells that are located on Orphan Sites, where permanent plugging (abandonment/decommissioning) is managed by the Orphan Fund. The current status of each well is provided

Measures and Definitions

1. ABAN – the well's reservoirs has been permanently plugged and the wellhead has been cut below surface (referred to as abandoned or decommissioned)
2. ABNZ – the well's reservoirs have been permanently plugged, but the wellhead has not yet been cut and capped below surface (referred to zonally abandoned or decommissioned)
3. INAC – production was suspended at the well; the well is inactive and awaiting decommissioning
4. CANC – the well permit was cancelled and was not drilled

12/7/2022
