1 - Permit number may be a site's well authorization number or facility number.

***STATUS Definitions**

CANCELLED WITH SURFACE DISTURBANCE: A location for which a well permit was issued and subsequently cancelled prior to drilling. Some surface disturbance requiring restoration may be present.

CASED: A well where a portion of the wellbore is lined with appropriate pipe or tubing (e.g. metal casing) and cemented to support and protect the hole from fluids and pressures, and to ensure well stability.

COMPLETED: A well (or zone) where the final stages of construction have been conducted to prepare for/enable the production of fluids, the observation of a reservoir's performance, or the injection or

disposal of fluids into a zone.

SUSPENDED: A previously completed well on which operations have been discontinued, the well is no longer being produced, and has not been plugged and permanently decommissioned.

DECOMMISSIONED: A well plugged downhole and converted to a condition that addresses the long-term integrity of the well, isolating the subsurface formations to prevent damage to freshwater supplies, potential petroleum reservoirs, and the environment. The well is withdrawn from service.

RESTORED: A site where oil and gas activities (e.g. wells, pipelines, facilities) are properly deactivated and the associated land is restored. The restoration process involves the removal or mitigation of any known contaminants and hazards due to the projects, bringing the surface area back to pre-operational conditions.
